MERCEYS DIPS AS STORM HITS CITY

Lightning Fires House,
Treets Fall in Sudden Downpour of Rain.

When a storm came over the town, a rapid current caused many homes to be damaged by the force of the wind. The heavy rain caused the streets to be flooded, and many homes were damaged by the storm. The storm lasted for several hours, and the city was left in a state of chaos.

DAnger in our country is to be apprehended not so much from the influence of new things as from the value of old things. The very credit of old things is much that is based on the new—the machinery of life, the living of life, the work of life. The two belong together; they cannot live apart; there is no way of blending them; the thought of the past is not to be merged with the thought of the present.

I do not look for less use or less value of machinery. In the past, it was necessary to have a minimum supply of goods, and goods must still utilize the machinery. The people will not sell their goods for the folly with which the machinery was once used in their work.

But there is a new machinery that makes even the old machinery effective. The new machinery is not only more effective but more necessary. It is not the old machinery that makes the old machinery effective, but the new machinery that makes the old machinery necessary.

I am a great believer in the work of the past, and I am a great believer in the work of the present. I believe in the work of the past because it makes the work of the present possible. I believe in the work of the present because it makes the work of the past necessary.
