One of the top students in the school, with plenty of time to change his mind, the 16-year-old Victor D'Ambrosio of Lakewood, four years ago, planned to pursue a career in business. But yesterday, he said, he had changed his mind and was going to study either mathematics or music when he graduates from high school next year.

The possibility of changing majors is not a new idea at Lakewood. During his senior year, the school offers a variety of electives for students to explore.

The decision to study mathematics or music is a significant one for D'Ambrosio, who has always excelled in his studies. He plans to attend a university in the fall, where he will have the opportunity to pursue his chosen field of study.

The school provides a range of resources for students to explore their interests, including tutoring and counseling services. D'Ambrosio has taken advantage of these resources, which have helped him to develop a strong foundation in his chosen fields.

The future looks bright for D'Ambrosio, who has always been a hard worker and a dedicated student. He plans to continue his education and to pursue a career in either mathematics or music, where he can use his knowledge and skills to make a difference in the world.
